Encoplot: Tuned for High Recall

Advices for plagiarists wannabes:

Encoplot: Tuned for High Recall

- 1: Don't! Or at least don't enter politics afterwards.

- 2: If you do, you'll be probably caught, but...

You can maybe make the software catching you look bad (plagdet) *if*:

- A: You copy the very same passage 7 to 17 times in you new "work"

- B: You insert something, such that the software finds everything you copied, but split in 3.

(also proposing a new plagiarism detection scoring function)

- Intrigued?
